

Jean-François Rondeau

Chief Innovation / R&D Officer

Deep Tech · Complex Physical Systems · Industrial & Physical AI

Greater Paris, France +33 (0)6 62 18 91 06 contact@jfrondeau.fr linkedin.com/in/jean-francois-rondeau

R&D and innovation executive with 20+ years turning deep-tech engineering into profitable business for global industrial groups. Former CEO of a deep-tech subsidiary, now Technical Director and Group AI Sponsor reporting to the Executive Committee. Bridges complex physical systems (acoustics, advanced materials, embedded electronics) with software and AI to create new products, services and business models. Seeking a Chief Innovation or Chief R&D Officer role in transportation, energy or deep-tech industries.

€520M

order intake in 2025, doubled in two years

+8%

operating income as deep-tech subsidiary CEO

100+

engineers led in cross-functional, multi-country teams

4 regions

programs won in Europe, North America, Japan & China

LEADERSHIP AREAS

Innovation & R&D

Innovation strategy & roadmaps · advanced engineering · technology transfer to programs · expert networks & ecosystems

Business & Transformation

P&L ownership · subsidiary scale-up · new business models & services · M&A support · change management

AI & Digital

Enterprise AI strategy · use-case selection & industrialization · data monetization · connected services · data governance

Scientific foundation: acoustics & vibration (NVH), advanced materials, signal processing, systems engineering. Ph.D. in Applied Acoustics.

PROFESSIONAL EXPERIENCE

Technical Director & Group AI Sponsor

Jan 2023 – Present · France

Trèves Group — *global mobility & industrial technology supplier*

Group-wide technical authority for product strategy, innovation roadmap and advanced engineering; sponsor of the Group AI transformation, reporting to the Executive Committee.

- **Growth:** doubled order intake from €250M (2023) to €520M (2025) by aligning advanced engineering with RFQ strategy for global customers.
- **AI transformation:** built and executed the Group AI roadmap approved by the Executive Committee, from opportunity screening and feasibility to adoption through training and change management.
- **New business models:** shifted innovation from component supply toward end-user solutions and services for fleet managers and mobility operators.
- **Operational excellence:** led transformation programs improving productivity, development lead times and quality.

Innovation Director & CEO, CREO Dynamics

Aug 2020 – Jan 2023 · France / Sweden

Faurecia Clarion Electronics — *deep-tech subsidiary in active noise control & smart acoustics*

Innovation strategy for connected services, data and sustainable technologies; full P&L of the CREO Dynamics subsidiary.

- **Scale-up:** turned a pure engineering house into a profitable hardware + software product company, reaching +8% operating income.
- **Diversification:** secured long-term non-automotive business, breaking single-industry dependency.
- **Global position:** won multi-year programs across Europe, North America, Japan and China.

- **Innovation engine:** built an international expert network in embedded electronics, signal processing and AI; launched data-monetization and advanced-monitoring initiatives.

Global Product Line Director

Jul 2018 – Jul 2020 · France

Faurecia Clarion Electronics

Global product strategy, market intelligence and P&L for a major electronics product line.

- **€450M** lifetime-sales order intake secured through business development and global RFQ leadership.
- Evaluated and supported M&A opportunities for international expansion and technology acquisition.
- International innovation awards in 2019 and 2020 for market-differentiating IoT products.

Earlier Leadership Roles

2002 – 2018 · France / China

Faurecia Interiors

- **Global Technology Senior Manager, Shanghai (2014–2018):** standardized global development processes and technology knowledge management, cutting R&D cycle time by 15% and physical prototypes by 30%.
- **Materials & Acoustics Manager (2002–2014):** led an advanced acoustics R&D team using simulation-driven innovation to support global engineering and marketing programs.

HANDS-ON DIGITAL & AI

Designed, built and operate a production SaaS platform for educators (web and native Android app, 4.5 years of continuous delivery) with generative AI embedded in user-facing features. This first-hand practice of modern software (API-first architecture, CI/CD, security, AI-assisted engineering) gives credible leadership of software and AI teams. github.com/rondeaujf

EDUCATION

Executive Certificate, AI & Big Data Project Management 2025–2026
(RNCP)

Université Paris Dauphine-PSL / MINES Paris

Ph.D., Applied Acoustics

2002

Le Mans University

M.Sc., Applied Acoustics & Fundamental Physics

1999

Le Mans University

AFFILIATIONS & LANGUAGES

Co-Chairman, NVH Expert Community, SIA (French Society of Automotive Engineers), since 2019
