

Jean-François Rondeau

Global Engineering & Technology Executive | Complex Systems & AI

Former CEO driving digital transformation and advanced engineering strategy for tier-one global organizations. Uniquely skilled at bridging complex physical systems (Acoustics, Materials) with cutting-edge software (AI, Data Monetization) to build scalable, high-margin business models. A cross-cultural leader recognized for defining strategic roadmaps and securing major international contracts, recently driving €480M in order intake within rigorous, high-stakes technical environments.

EDUCATION

1999 – 2002 Grenoble, France

Ph.D., Applied Acoustics –
University of Le Mans, France

1997 – 1999 Le Mans, France

M.Sc., Applied Acoustics &
Fundamental Physics –
University of Le Mans, France

Professional Summary

"Directing global technical teams to transform disruptive innovations into scalable, profitable business solutions across complex, cross-cultural environments"

Current Position

Technical Director & Group AI Sponsor

January 2023 – Present

Scope:

Serve as the global technical authority, directing product strategy, innovation roadmaps, and advanced engineering for complex material and acoustic systems. Steer worldwide engineering consistency, direct cross-functional regional teams, and facilitate seamless technology transfers across all project phases.

Concurrently pilot the group's artificial intelligence transformation, securing executive committee (Codir) approval to integrate enterprise-wide AI initiatives.

Key Achievements:

- **Revenue & Business Growth:** Directly contributed to a massive increase in order intake, securing €520M in 2025 (doubling the €250M achieved in 2023) through strategic RFQ leadership and advanced engineering alignment.
- **Enterprise AI Transformation:** Defined and executed the corporate AI roadmap; identified strategic opportunities, assessed technical feasibility, and drove organizational adoption through targeted communication and training programs. Regularly reported progress and escalated key strategic decisions to the Group Codir.
- **Strategic Innovation & New Business Models:** Pioneered a sustainable, end-user-focused innovation strategy that shifted the traditional hardware supply approach to a modern business model directly leveraging fleet managers and mobility players.
- **Operational Excellence:** Spearheaded critical transformation projects that significantly improved productivity, accelerated development timelines, and elevated quality standards for sustainable technology initiatives.

CORE COMPETENCIES

- **Leadership & Strategy:** Executive Vision Strategy, Cross-Functional Team Leadership (100+ engineers), Complex P&L Management, Multi-Country Operations, C-Suite Communication.
- **Technical Expertise:** AI Roadmaps, Systems Engineering, Data Monetization, Hardware/Software Integration, Advanced Acoustics (NVH).

LANGUAGE SKILLS

-  French, Native
-  English, Professional

Key Experiences

Innovation Director & CREO Dynamics CEO

Faurecia Clarion Electronics | Aug 2020 – Jan 2023

Scope

Directed the strategic product roadmap for connected services, data enhancement, and sustainable technologies. Served as CEO of the CREO Dynamics subsidiary, leading cross-functional teams to design, model, and deliver complex hardware and software solutions. Influenced C-level strategic direction, represented client interests internally, and managed resource allocation across large-scale global projects.

Key Achievements:

- ➔ **Startup Scaling & P&L Leadership:** Scaled the tech startup subsidiary with high profit margins, successfully transforming pure engineering expertise into scalable, deliverable product platforms encompassing both hardware and software.
- ➔ **Cross-Industry Expansion:** Successfully diversified revenue streams by securing long-term, non-automotive business models, achieving a +8% Operating Income.
- ➔ **Advanced Tech & AI Integration:** Built, structured, and led an elite expert network specializing in on-board electronics, signal processing, and AI.
- ➔ **Disruptive Innovation & Data Monetization:** Generated new market solutions across multiple fields, pioneering disruptive initiatives in data monetization and advanced monitoring systems.
- ➔ **Global Market Penetration:** Positioned the organization as a premier global player in advanced acoustic control systems across Europe, North America, Japan, and China, securing multiple high-value program awards from multinational partners.

Product Line Director

Faurecia Clarion Electronics | Jul 2018 – Jul 2020

Scope

Directed global product strategy, market intelligence, and P&L for a major electronics product line. Led strategic business planning, developed differentiating value propositions, and supported key acquisition and M&A activities to drive international expansion and regional profitability.

Key Achievements:

- ➔ **Revenue Generation:** Secured €450M in yearly lifetime sales order intake through strategic business development and global RFQ leadership.
- ➔ **Global Market Expansion:** Successfully captured major, high-value programs with multinational partners across European and Asian markets.
- ➔ **Industry Recognition:** Won multiple high-profile international innovation awards (2019, 2020) for advanced, market-differentiating product development.

Additional Leadership Experience

Global Technology Senior Manager | May 2014 – Jun 2018 | China

Key Achievements:

Directed international technology knowledge management and standardized technical processes, successfully implementing development tools. This strategic initiative reduced R&D cycle times by 15% and decreased physical prototype production by 30%.

Materials & Acoustic Manager | Nov 2002 – Apr 2014

Key Achievements:

Led an advanced acoustics R&D team, leveraging complex simulation tools and expertise in Ray Tracing and Porous media to drive product innovation and support global engineering and marketing programs.
